

HELIX 5 IN 1

WATER-BURN TEST PROCEDURE

NOTE: THIS TEST CONTAINS **NO GASOLINE** AND IS DESIGNED TO SHOW HOW HELIX 5 IN 1 DEALS WITH WATER CONTAMINATION AND HOW HELIX 5 IN 1 CAN BREAK UP AND BOND TO THE WATER MOLECULES ALLOWING THE WATER TO BURN.

SETUP:

- 1) PLACE THREE BOTTLES ON FLAT, SECURE SURFACE
- 2) FILL EACH BOTTLE APPROXAMATLY 1/4 (0.5oz) FULL WITH WATER
- 3) THEN POUR ON TOP OF THE WATER, A SAMPLE OF EACH FUEL ADDITIVE TO BE TESTED, FILLING EACH BOTTLE APPROXIMATELY 3/4 FULL.
- 4) SCREW CAP ON JARS, SHAKE AND LET SETTLE
- 5) THIS WILL DEMONSTRATE THE EFFECTS OF WATER ON ALL THE PRODUCTS BEING TESTED, AND SHOW HOW HELIX 5in1 DOES NOT SEPERATE FROM THE WATER, BUT ACTUALLY BREAKS UP THE WATER AND BONDS TO THE WATER MOLECULES.
- 6) NOW REMOVE THE CAPS FROM THE JARS

DEMONSTRATION:

DEMONSTRATE EACH SAMPLE USING THE FOLLOWING METHOD:

1. USE THE HELIX 5in1 AS THE 3RD OR FINAL SAMPLE TO BE TESTED
2. USING 1 DRY WICK, DIP WICK INTO APPROXIMATELY ONE INCH OF THE SAMPLE FUEL ADDITIVE
3. REMOVE AND LIGHT ON FIRE.
 - THIS WILL SHOW THAT OTHER PRODUCTS BURN UNCLEAN- BLACK SMOKE, WHICH IS CARBON & SOOT ARE ALL BY-PRODUCTS OF THE BLACK SMOKE.
4. REPEAT STEP 2&3 FOR SECOND AND THIRD SAMPLES
 - NOTE: WITH THE HELIX 5in1, THERE WILL BE NO SMOKE, CARBON, OR SOOT; JUST A CLEAN BURN.
 - NOTE: THE HELIX 5in1 IS BURNING **WITH** THE WATER AND THE OTHER SAMPLES BURN ONLY THE SAMPLE PRODUCT, BECAUSE WATER AND OIL DO NOT MIX!
5. INSERT ONE STEEL NUT INTO EACH SAMPLE JAR AND SEAL WITH CAP
 - NOTE: THE NUT REPRESENTS HOW THE INSIDE OF A STEEL GAS TANK WILL REACT TO WATER WITH EACH OF THE SAMPLE PRODUCTS
 - THE NUT WITH THE HELIX 5in1 WILL NOT RUST
